

PERCUSSION INITIATOR

The Rapid Deflagrating Material (RDM) initiator provides a deflagrating output which is more suitable to igniting flammable solids and power charges than detonating output devices. This device has a notable brown stripe along the side of the cap so that it won't be confused with the identically sized CLCP, or also known as CP Detonator.

APPLICABLE SPECIFICATIONS

- All-Fire: 12.4 ft-lb
- No-Fire: 7.4 ft-lb
- Operating Temperature: 500°F for 12 hours
- Explosive Materials:
 - Primer: 24 mg
 - Output Charge: 380 mg
 - NEW: 404 mg
 - Number / Class: UN0454 / 1.4S
 - Name: Igniter
 - Reference Number: EX20140607
 - NRCanada and CE approved
